## Arthur T. Everham Safety Award

---

Each year at the DCA Annual Convention, companies are rewarded for the effectiveness of their safety programs. Plaques are given to companies with exemplary safety records and practices.

As of January 2005, the qualifications have changed and were compliant with the OSHA 300 L.C. and the categories had been expanded from two to three. The categories to be awarded were those companies that complete less than 250,000 manhours of distribution construction per year, those that work more than 250,000 but less than 600,000 manhours, and those companies that work more than 600,000 manhours.

In February 2009, the qualifications changed and were compliant with OSHA 300 LC, the number of categories remained the same. The category manhours themselves had changed to companies that complete less than 350,000 manhours of distribution construction per year, those that work more than 350,000 but less than 700,000 manhours, and those companies that work more than 700,000 manhours. The manhours were revised for the 2013 award to less than 300,000; 301,000 to 899,000; and over 900,000 manhours of distribution construction per year to create a more even competitive distribution. The manhours distribution was again revised in 2016 to four evenly distributed categories based on the total number of submissions.

Criteria used by the DCA Safety/Risk Management Committee for judging includes: the number of OSHA lost workday cases, number of OSHA restricted duty days, number of first-aid cases, number of fatalities, the presence of a documented safety program, the use of a drug-testing program, and the company's Experience Modification Rate.

Beginning in 2022, The revised and updated judging criteria includes: the number of OSHA lost workday cases, number of OSHA restricted duty days, number of fatalities, the presence of a documented safety management system (SMS), the use of a drug-testing program, and the company's root cause analysis (RCA) system.

<u>Year</u>	<u>Hours</u>	<u>Company</u>
